

Tree: Postorder Traversal

Problem Statement

You are given a pointer to the root of a binary tree; print the values in post-order traversal.

You only have to complete the function.

Input Format

You are given a function,

```
void Postorder(node *root) {  
  
}
```

Output Format

Print the values on a single line separated by space.

Sample Input

```
  3  
 / \  
5  2  
/\  /\  
1 4 6
```

Sample Output

```
1 4 5 6 2 3
```
